

## CANPEX™ UV PLUS – PEX POTABLE TUBING

FLEXIBLE, DURABLE, AND TRUSTED IN HOT AND COLD POTABLE WATER SYSTEMS

### Features & Benefits

CANPEX™ UV Plus is a single-layer, UV-resistant PEX tubing with a PEX5306 certification. Its advanced formulation ensures top-tier durability, chlorine oxidation reduction potential (ORP) resistance, and retention of physical properties under UV exposure, including:

- Faster, easier, and more cost-effective installation
- Compatible with standard PEX tools and fittings
- Resistant to corrosion and freeze damage
- Resists scaling and pitting
- Safe, chemical-free, and lead-free installation
- Includes a metal deactivation additive to prevent polymer degradation
- Available in both straight lengths and coils
