

DIAMONDBACK® FLEXIBLE GAS PIPING

CORRUGATED STAINLESS STEEL (CSST) TUBING

Diamondback®
FLEXIBLE GAS PIPING

Features & Benefits

Diamondback® (CSST) tubing supplies natural gas or LP gas to a variety of equipment, including appliances, BBQs, fire pits, pool heaters, and more. Diamondback is a reliable, cost-effective flexible gas piping system for commercial, industrial, and residential applications. Its flexibility enables quick and easy installations, allowing you to use smaller diameter pipes and fittings on your next project, saving you time and money.

- Superior Flow Rates: saves money on labour and materials
- Easy-to-Install Fittings: the convenient 3-piece compression style fitting system is quick, reliable, and provides solid connections to Diamondback CSST tubing
- Variety of Reel & Coil Sizes: 3/8" to 1-1/4" diameter and 50-250ft. coil lengths
- Operating Pressure: Max: 25psi
- Flexible corrugated tubing made of 300 series stainless steel
