

LYNX-PEX™ Water Service Tubing

CATEGORY 821

FEATURES & BENEFITS

LYNX-PEX™ municipal water service tubing, made in Canada by CB Supplies Ltd., delivers seamless water distribution with reliable PEX-b material and a hassle-free 25-Year Warranty. Engineered to exceed all municipal water service codes and standards, it offers maximum flow rates, corrosion resistance, and a lightweight, flexible design

Designed to meet and exceed ANSI/AWWA C904, ASTM F876, and CSA B137.5 requirements, LYNX-PEX boasts the industry's highest chlorine and UV resistance ratings for PEX tubing and it complies with NSF/ANSI/CAN 61 and NSF/ANSI 14, meeting the most stringent drinking water system standards.

- **Exceptional Durability:** 6-month UV protection, maximum chlorine resistance rating for PEX and burst pressure that exceeds industry requirements.
- **Maximum Flow Rates:** LYNX-PEX boasts a smoother wall surface than copper service lines, resulting in reduced pumping energy costs and higher flow rates.
- **Superior Corrosion Resistance:** Thanks to its material properties, LYNX-PEX is resistant to common copper service line issues like mineral build-up and corrosion, ensuring a lifetime of delivering high-quality water to consumers.
- **Flexible and Lightweight:** LYNX-PEX installs with ease, saving you time and effort.
- **SIZES (CTS OD) SDR-9:** 3/4", 1", 1-1/4", 1-1/2", and 2" diameter | **Coil lengths:** 100ft, 300ft, 500ft, and 1,000ft
