

RADIANT MANIFOLDS & ACCESSORIES

CATEGORY 076

HRH Manifold Kit –
Stainless Steel

FEATURES & BENEFITS

IVAR radiant manifolds are the perfect choice for efficiently distributing heating and cooling fluids in radiant systems, as well as for snow and ice melting systems. These manifolds offer precise circuit control, allowing manual setup or integration with a controller or space thermostat. Each IVAR radiant manifold is conveniently packaged with all the necessary components in one box.

Choose from two header sizes (1" and 1 ¼" high capacity) with configurations of 6 to 12 loops to match your design layout.

Compression x Manifold Adapters

Actuator

Differential Pressure
Bypass Assembly

Manifold Cabinet

Heat Transfer Plate
